Diwali Celebration (29/10/2024)

Synopsis Presentation (Nov 11, 2024)

Market Demand

1. Increasing Number of Patients: As more people seek medical care, hospitals need to ensure a steady flow of patients, maintaining quality and accuracy.
2. Rising Operational Expenses: With more data and faster rates by using technology instead of paper-based.
3. Patient Care Costs: Better systems help reduce and streamline costs on testing, patient care, and handling administrative work.
4. Data Security: Hospitals are required to keep patient information safe, and AI/ML helps ensure data protection.
5. Digital Transformation: Many hospitals are moving from manual to digital systems, reducing the chance for error.
